The things we do for you

★ Investments Package

Irrespective of the legislative and regulatory requirements relating to the investment of surplus Council funds, there is a need for the probity and openness of the process of investment selection. This can only be achieved by full documentation of the investment options available and considered at the time.

Investment records must be maintained fully accurately and up to date, and often the proceeds must be apportioned between different accounting entities.

If your accounting system doesn't provide all these features at a reasonable cost, try the spreadsheet templates that do, at an unreasonably low cost!
