

# Plant Hire Rates Calculator

Originally developed to comply with NT requirements, but applicable to all States - this product provides a simple, reliable and sound basis for setting hire rates.

Simply insert the few details required - cost, plant description, estimated use, etc - and the spreadsheet template does the rest. Try a number of different utilisation estimates and see the effect that that has on the rates! Use hours or kilometres - both options are available!

Of course, you will still have to periodically review rates from time to time to ensure that our standards are applicable to your actual experience, and to adjust your rates in light of that experience, but our templates provide a sound, simple and easy start point.

# Direct Labour Oncosts Calculator

Quickly calculate estimated direct labour oncost recovery rates using our simple template. Adapts to all awards, and serves as a useful checklist of the appropriate costs for absorption.

- Hard copy print for your files
- Easy-to-use colour coded layout for quicker data entry
- Flexible formatting facilitates tailoring to your Council's exact requirements
- Comprehensive User Guide
- Re-useable for each item - no updates required
- No special software or hardware required - template uses standard version of Microsoft Excel
